## — PTT(POLYTRIMETHYLENE TEREPHTHALATE)

PTT (polytrimethylene terephthalate) is a thermoplastic that can be spun into both fibers and yarns. PTT belongs to a class called aromatic polyesters.

In both carpet and textile markets, PTT combines the chemical resistance characteristics that you can get from polyester with the elastic recovery and resilience of nylon. PTT also offers inherent stain resistance, is continuously printable and dyeable without speciality chemicals in a full-colour range.

### **PTT as a fiber has the following characteristics:**

- Soft
- Resistant to stretching
- Quick drying
- Wrinkle resistant
- Able to retain heat-set plates and creases
- Easily washed

Fabrics made with CORTERRA Fibers have great appeal in the fast-growing stretch market. Unlike other stretch fabrics, these easy-care fabrics offer a combination of features that include the softness of nylon, beautiful drape and brilliant colors.

### **Applications**

**Apparel:** For every form of clothing, such as casual, swimwear, activewear and innerwear.

**Home furnishing:** Carpets, draperies, sheets and pillowcases, wallcoverings and upholstery

**Other:** Non-woven, automobile upholstery.
