— REFLECTOR YARN

There are occasions where your newly created product could get a real boost and advantage over your competitors if this product had the capability to retro-reflect incoming light. We are happy to offer you solutions. This retro-reflect ability is normally given by coating fabrics in a special process.

We know are happy to offer a solution where the yarn, both available in flat as well as in embroidery version. This fact helps you to solve a lot of problems and does allow you to design innovative new products to meet the ever changing market demands.

Retro reflective technology can be obtained with the use of two types of raw materials:

- Glass beads
- Micro prisms

Our reflector yarns are manufactured with films having glass beads incorporated. The role of the glass beads is to reflect the incoming light to its original light source. This means that the glass beads act as spherical lenses and return the incoming light to the light source when the reflective layer is set in its focus point.

REFLECTOR YARN PRODUCTS

We offer you the widest selection of reflective yarns that will guarantee both night time safety and avant garde fashion. The retro-reflective effect is obtained from the presence of thousands of glass beads that reflect the light returning it to its source. It is a security yarn that guarantees visibility at night. Ideal for:

- Sportswear
- Ribbons
- Laces
- Woven labels
- Embroidery
