— ANTIMONY FREE YARN

Antimony free Yarns, has the same properties of polyester yarns like high abrasion resistance and which are very easy to clean and handle for mattress application. Availability of Deners is 75,100,150. Antimony oxide is worldwide used as catalyst in polyester fiber and filament yarn production processes and therefore, is often part of textile materials. Partial quantities of these antimony compounds can dissolve out of the textiles through sweat and be absorbed via

respiratory tract or skin, which can cause irritation of eyes, skin and lungs, especially for sensitive people. In case of the Diolen Hypoallergenic yarns, the commonly used antimony oxide is replaced by non-toxic substitutes.
