## REFLECTOR YARN

The thread reflects the light, making you seen! It's as simple as that! This super shiny reflective thread, is grey in normal daylight, but if you turn so it catches the light, it reflects all the light and turns a bright white, making you seen.

Reflective material is created with tiny spherical glass beads (1/2 the size of a human hair) - Made from optical-grade glass, these perfect microscopic spheres are coated on one side

with aluminium and then organized aluminium-side down and adhered to material to create a reflective surface.
