---- SPACE DYED YARNS

Space dyeing is a process used for creating yarns with multiple colors effect. Generally, a yarn comes only in one color. But a space dyed yarn comes with more than two colors on them. This type of space dyed yarns is also known as dip dyed yarns.

The secret to a well produced space dyed yarn is a chemical called as 'mordant'. This chemical helps to fix the dye on the yarn after each color is

dyed. This is why a space dyed yarn is capable of holding more than one or more colors.
